ITALIANO

Valvole lamellari progettate e ridisegnate con angolo di flusso e con sezione di portata ricalcolata, corpo in lega di alluminio al silicio o in materiale polimerico caricato con fibre con sede della lamella ricoperta in viton.

Petali in materiale composito di fibre in karbonit e carbonio. Eseguite con processi produttivi avanzati e con l'impiego di materie prime rigidamente selezionate, studiate per motori da competizione, testate sui campi di gara.

ENGLISH

These reed valves are designed with a flow angle and with a recalculated flow capacity. The body is made of aluminium alloy with silicon or carbon fiber; the reed valve seat is Viton plated.

The petals are made of a material composed of karbonit and carbon fibres. They are manufactured with advanced production processes and with carefully selected prime materials. These reed valves are designed for racing engines and they have been tested and proven on racetracks.

FRANÇAIS

Clapets projetés et dessinés avec l'angle de flux et avec la section de charge recalculée, corps en alliage d'aluminium au silicium ou en matériel polymère additionnée de fibres avec le siège de la lamelle revêtu de viton.

Lamelles de matériel composé de fibres de carbone et karbonit. Réalisés par des procédés de production très avancés et par l'emploi des matières premières sévèrement sélectionnées, projetées pour des moteurs racing, testées sur les circuits.
